BRUNO TREZZA

AI BUSINESS ANALYST - PRODUCT OWNER

PROFILE

I have passion for Data and AI. As a dedicated professional, I enjoy knowing my decisions improve others' lives. With a data-centric perspective, I actively engage in product definitions and user experience discussions. I have experience working on cross-country projects, with strong communication skills and a keen eye for execution details. I'm empathetic, responsible, and a fast learner, always striving to stand out and make a meaningful impact.

SKILLS

- Integral Vision
- Assertive
- Empathic
- Responsible
- Trustworthy
- Analytical
- Python & R for Data Science
- Azure DevOps & Jira
- MS Office
- SQL, Mongo DB
- Git, GitHub

EXPERIENCE

Business Analyst - Product Owner

Farmers Insurance (Via Capgemini) | Jul 2025 - To date

Project:

- Internal Power BI dashboards for Sales and Executive Management

Duties:

- Led end-to-end requirements elicitation with executive, commercial, and operational stakeholders to define business-critical KPIs
- Translated business objectives into reporting requirements, coordinating with data and technical teams to integrate multiple data sources
- Designed, maintained, and enhanced Power BI dashboards
- Actively supported data validation, UAT cycles, stakeholder demos, and feedback-driven refinements to ensure trust and adoption of insights

Achievements:

- Delivered executive and managerial dashboards that improved visibility into commercial performance and portfolio evolution
- Strengthened expertise in insurance analytics, stakeholder management, KPI definition, and business-oriented BI solutions

Technology & AI Consultant | Software & Web Solutions

Self-Employed | Jan 2025 - To date

Projects:

- Full-stack personal website with AI-enhanced features
- Corporate website with e-commerce (in progress)

Duties:

- Designed and delivered end-to-end web solutions integrating APIs, dashboards, CI/CD pipelines, and cloud infrastructure
- Integrated AI services and automation workflows to enhance functionality and delivery speed

Achievements:

- Built production-ready prototypes across multiple environments using AI and cloud technologies
- Strengthened full-stack development, API design, and cloud deployment expertise

Business Analyst - Product Owner

Hexaware Technologies | Dec 2021 - Jan 2025

Projects:

- AI-assisted chatbot (RAG, OpenAI LLM) for EY
- Internal API Catalog for EY collaborators

Duties:

- Elicited and documented business and technical requirements; user stories and acceptance criteria (Gherkin format)
- Led backlog refinement and Scrum ceremonies using Azure DevOps to optimize delivery pipelines
- Coordinated stakeholders and delivery across multicultural, distributed teams

Achievements:

- Hands-on experience integrating LLMs (OpenAI) into production-grade chatbots, enhancing customer service automation
- Developed expertise with Postman (API testing), MongoDB (NoSQL database), and Miro (remote collaboration)
- Strengthened end-to-end product ownership and cross-cultural communication skills

INTERESTS

- Applied Artificial Intelligence (AI)
- Machine Learning
- Generative AI (GenAI)
- Recommender Systems and Personalization Algorithms
- Data Engineering and Data Pipelines
- Cloud Computing (AWS, Azure, GCP)
- Automation
- Natural Language Processing (NLP)
- Business Intelligence (BI) and Data-Driven Decision Making
- Prompt Engineering
- Product Management for AI-powered solutions
- IoT, Home Automation
- Personal AI Powered solutions

EXPERTISE

- Artificial Intelligence
- API Development & Integration
- Enterprise Solutions (ERPs)
- Micro Services Architecture
- Agile Methodologies (Scrum, Kanban)
- Project Management
- Continuous Integration / Continuous Delivery (CI/CD)
- Stakeholder Management
- Prompt Engineering and AI Toolchains

EXPERIENCE CONTINUED

Business Analyst
Globant | June 2021 - Dec 2021

Project: Forecasting Tool Support for Deloitte client.

Duties & Achievements:

- Participated in Business Analyst Academy training program to strengthen BA core skills
- Authored and managed user stories and backlogs in Jira
- Supported agile ceremonies and acted as liaison between business and technical teams
- Provided leadership and guidance to the development team, acting as a bridge between technical and business stakeholders
- Solid foundation in Scrum and Kanban; completed certifications in Business Analysis, Agile PM, and AI tools

Functional Product Leader - Business Analyst
Beesion Technologies | Dec 2016 - May 2021

Projects:

- CPQ (Configure-Price-Quote) suite on-site implementation for Claro Central America (5 countries).

Duties:

- Led requirements analysis, user testing, documentation, and onsite implementations
- Delivered product training and production support for business users and stakeholders
- Prioritized backlog, monitored issues, and collaborated closely with developers and managers

Achievements:

- Led successful CPQ deployments across 5 countries, achieving a high adoption rate and operational impact
- Developed strong client-facing skills, effective communication, and analytical reporting under high-pressure environments.
- Strengthened abilities in task prioritization, risk management, and agile collaboration across geographically dispersed teams.

STUDIES

Data Science Analyst | February 2021
Digital House Coding School

- Covered: Supervised/Unsupervised Learning, NLP, Neural Networks, Feature Engineering, Model Evaluation, Hyperparameter Tuning, Ensemble Methods, Data Wrangling, Reinforcement Learning, and Time Series Analysis.
- Final project: Built and deployed a recommendation system using Web Scraping, EDA, Wrangling, Hyperparameter Optimization, and Flask deployment

Data Analyst | April 2020
EANT

Covered: EDA, ETL, Data Cleaning, Data Viz, SQL, Dashboarding, Hypothesis Testing, Correlation & Regression, Time Series.
Final Project: Built and deployed a dashboard

Bachelor's Degree in Organizational Management
July 2015
Buenos Aires University

- Comprehensive 2,600-hour program focused on business management, strategic planning, finance, marketing, talent management, and digital transformation.
- Developed strong skills in project design, organizational governance, financial analysis, and data-driven decision-making.
- Final trajectory oriented to employability in business development, public sector management, and technological innovation.
