

BRUNO TREZZA

AI BUSINESS ANALYST - PRODUCT OWNER

PROFILE

Technical Product Owner with a passion for Data and AI, and hands-on exposure to Node.js, React, Python, and cloud-native stacks. Capable of working alongside engineering teams with shared technical context. With a data-centric perspective, I actively engage in product definition, backlog prioritization, and user experience discussions. Experienced in cross-country, multicultural projects with strong communication skills bridging technical and non-technical stakeholders. Empathetic, fast learner, and execution-focused — always striving to make a meaningful impact through software that delivers real value.

SKILLS

- Integral Vision - Python & R for Data Science
- Assertive
- Empathic
- Responsible
- Trustworthy
- Analytical
- Azure DevOps & Jira
- MS Office
- SQL, Mongo DB
- Git, GitHub

LANGUAGES

Spanish - C2
English - C1
Portuguese - C1
Russian - B1

EXPERIENCE

Business Analyst - Product Owner

Farmers Insurance (Via Cappemini) | Jul 2025 - To date

Project: Internal BI & Data Products

Duties:

- Led end-to-end requirements elicitation with executive and commercial stakeholders to define business-critical KPIs, translating them into structured reporting specifications for data and engineering teams.
- Authored and maintained backlog items covering data integration, dashboard behavior, and visualization logic; coordinated UAT cycles and feedback-driven refinements aligned with Agile delivery practices.
- Designed and enhanced Power BI dashboards consuming multiple data sources, improving visibility into commercial performance and portfolio evolution for senior leadership.

Key Skills Applied:

- KPI definition, stakeholder alignment, backlog management, data product delivery, UAT facilitation

Technology & AI Consultant | Software & Web Solutions Self-Employed | Jan 2025 - To date

Projects: Billing System, Websites, Personal Apps

Duties:

- Designed and delivered full-stack web solutions integrating REST APIs, CI/CD pipelines, and cloud infrastructure (hands-on with deployment environments, environment config, and build automation).
- Integrated AI services and LLM-based automation workflows to enhance product functionality and accelerate delivery cycles.
- Built production-ready full-stack prototypes using React and Node.js, integrating REST APIs, CI/CD pipelines, and cloud infrastructure — applying AI-assisted development workflows to accelerate delivery and deepen hands-on technical fluency.

Key Skills Applied:

- Full-stack development, API integration, cloud deployment, AI/LLM tooling, CI/CD

Business Analyst - Product Owner

EY (Via Hexaware Technologies) | Dec 2021 - Jan 2025

Projects: AI-assisted chatbot & Internal API Catalog

Duties:

- Elicited and documented business and technical requirements for a RAG-based AI chatbot (OpenAI) and an internal API Catalog — translating complex technical architecture into user stories with Gherkin-format acceptance criteria.
- Led backlog refinement and Scrum ceremonies in Azure DevOps, maintaining delivery pipeline health across multicultural distributed teams.
- Gained hands-on experience with Postman, MongoDB, and OpenAI API integration within a .NET/Angular environment — enabling effective technical collaboration with engineering teams.
- Served as the internal voice of product within the software engineering team, balancing stakeholder expectations with technical feasibility and sprint capacity.

Key Skills Applied:

- LLM/API product ownership, Scrum, Azure DevOps, technical user stories, NoSQL, distributed team coordination

INTERESTS

- Applied Artificial Intelligence (AI)
- Machine Learning
- Generative AI (GenAI)
- Recommender Systems and Personalization Algorithms
- Data Engineering and Data Pipelines
- Cloud Computing (AWS, Azure, GCP)
- Automation
- Natural Language Processing (NLP)
- Business Intelligence (BI) and Data-Driven Decision Making
- Prompt Engineering
- Product Management for AI-powered solutions
- IoT, Home Automation
- Personal AI Powered solutions

EXPERTISE

- Artificial Intelligence
- API Development & Integration
- Enterprise Solutions (ERPs)
- Micro Services Architecture
- Agile Methodologies (Scrum, Kanban)
- Project Management
- Continuous Integration / Continuous Delivery (CI/CD)
- Stakeholder Management
- Prompt Engineering and AI Toolchains

EXPERIENCE CONTINUED

Business Analyst

Globant | June 2021 - Dec 2021

Project: Forecasting Tool Support for Deloitte client.

Duties & Achievements:

- Authored and managed user stories and backlogs in Jira; supported Agile ceremonies acting as liaison between business and technical teams.
- Completed Globant's Business Analyst Academy, with certifications in Business Analysis, Agile PM, and AI tools.
- Established foundation in Scrum and Kanban methodologies applied to software delivery.

Functional Product Leader - Business Analyst

Beesion Technologies | Dec 2016 - May 2021

Projects:

- CPQ (Configure-Price-Quote) suite on-site implementation for Claro Central America (5 countries).

Duties:

- Led requirements analysis, UAT, documentation, and on-site implementation of a CPQ (Configure-Price-Quote) platform across 5 countries — acting as the primary bridge between client stakeholders and the engineering team.
- Managed and prioritized product backlog, triaged issues in coordination with developers and engineering managers, and delivered end-user training and production support.
- Developed deep expertise in task prioritization, risk management, and agile collaboration across geographically distributed teams under high-pressure delivery environments.
- Led successful CPQ deployments across 5 countries, achieving a high adoption rate and operational impact.

Key skills applied:

- Multi-country product rollout, backlog ownership, client-facing product leadership, on-site implementation

STUDIES

Data Science Analyst | February 2021

Digital House Coding School

- Covered end-to-end ML pipeline topics: Supervised/Unsupervised Learning, NLP, Neural Networks, Feature Engineering, Hyperparameter Tuning, Ensemble Methods, and Time Series Analysis.
- Final project: Designed and deployed a recommendation system applying Web Scraping, EDA, Hyperparameter Optimization, and Flask deployment — gaining hands-on experience with Python-based API serving.

Data Analyst | April 2020

EANT

EANT

- Covered: EDA, ETL, Data Cleaning, Data Viz, SQL, Dashboarding, Hypothesis Testing, Correlation & Regression, Time Series.
- Final project: Built and deployed a functional analytics dashboard end-to-end.

Bachelor's Degree in Organizational Management

July 2015

Buenos Aires University.

- 2,600-hour program covering strategic planning, finance, marketing, talent management, and digital transformation.
- Developed strong skills in project governance, financial analysis, and data-driven decision-making applied to business and technology contexts.
